Graduated scale 02

Rifila

Single head trimming machine

Single head rising blade trimming machine, for extruded profiles and flat sheets made of aluminium. The especially rugged structure allows very sharp and accurate cutting in order to obtain exactly parallel faces of the profiles. Furthermore the machine can be set-up with support roller conveyors to extend its versatility. The blade guard has been designed and developed to ensure working under the best possible conditions of safety.

01

Detail of adjustable stop

This stop is referred to the blade centerline and allows rapid definition of area of metal removal.

02

Graduated scale

The graduated scale allows mechanical setting of the height of the blade from the horizontal work table in relation to the material to be trimmed.

03

Cutting zone

The rugged and generous cast iron horizontal work table provides a considerable support surface in order to allow trimming both profiles and flat sheets made of aluminium.

BLADE	
Carbide-tipped blade dia. (mm)	350
BLADE FEED	
Max. trimming height (mm)	120
CUTTING ZONE GUARDS	
Local, with manual adjustment	
LUBRICATION SYSTEM	
Spray-mist lubrication with water and oil emulsion	
MOTOR	
Three-phase brake motor, operating time 10 sec. (kW)	1,5
